Nutritional Information is based on Orion's product formulations and are compiled from nutritional information from the following sources: Suppliers, nutritional analysis using industry standard software, published resources, testing conducted by accredited laboratories, and the USDA Nutrient Database for Standard Reference. The data is expressed in values based on federal rounding and other applicable regulations. A number of factors may affect the actual nutritional values for each product, such as variations in serving size, preparation techniques, differences in product assembly at the retail location, seasonal influences, and area of country. Substitutions of ingredients may alter nutritional values. All information is intended for general knowledge and is not a substitute for medical advice or treatment for specific medical conditions. This data reflects US products and builds only.

Nutrient values calculated using the following software:

EZ Form Nutrition and Compliance Label Software
